

PETRONAS GEAR MEP SERIES

High Performance Heavy Duty Industrial Gear Oil

PETRONAS Gear MEP Series are high performance industrial gear oils specially developed for various types of enclosed industrial gears operating under normal to heavy duty conditions. Formulated with high quality selected mineral base oils enhanced with advanced extreme pressure, anti-wear, antioxidant, anti-rust and anti-foam additives, PETRONAS Gear MEP oils provide excellent extreme pressure and anti-wear protection, smooth operation of the gear drives and up to 1,5x longer lasting performance*.

PETRONAS Gear MEP Series meets or exceeds key industrial specifications and OEM requirements.

*vs. minimum requirements of industrial gear oils to pass the viscosity increase test (ISO 4263-4 @95°C)

Applications

PETRONAS Gear MEP Series are recommended for use in:

- various types of enclosed industrial gears (spur/helical/bevel/planetary) with circulation or splash lubrication systems operating at bulk oil temperature up to 110°C
- gears drives subjected to heavy loads
- gears drive sensitives to sludge formation
- non-gear applications include shaft couplings, and heavily loaded plain bearings operating at slow speeds

Features and Benefits

| Features | Benefits |
|---|---|
| Excellent extreme pressure protection | Excellent extreme pressure performance giving long gear life in severely loaded gear drives |
| Excellent anti-wear protection | Protects equipment components from excessive wear and provides longer equipment life |
| Excellent thermal and oxidation stability | Maintains performance levels under high temperatures and pressure, enabling long oil drain intervals |
| High resistance to sludging | High cleanliness for sludge free gear drives |
| High rust & corrosion protection | Inhibits the corrosion process that occurs in presence of water, improving equipment life |
| High water separability | Due to high water separability the gear drives are protected from water degenerative effects, maintaining system efficiency at required level and reducing maintenance costs |
| High multi metal compatibility | Compatible with most metal alloys ensuring trouble free performance of the system |
| High seal and elastomer compatibility | Compatible with most seals and elastomers, which prevents oil leaks and contamination due to seal erosion |

All technical data are provided for reference only and all specification based on DIN 51517-3 and ISO 12925-1

Individual limits accordingly with each viscosity grade / (1): not required in specification / SS is available upon request including quality control limits / * PETRONAS GEAR MEP Series passed stage 14 when FZG was run, however according to ISO 14635-1 tests results higher than 12 should be reported as >12.
