

## **PETRONAS GREASE PE HS**

### **Polyethylene Grease**

PETRONAS Grease PE HS is a Polyethylene grease specially developed to withstand the high centrifugal forces created by rotating couplings.

Formulated with high viscosity mineral base oils enhanced with Polyethylene thickeners, advanced extreme pressure, antioxidant, anti-rust and corrosion inhibitor additives. PETRONAS Grease PE HS provides excellent resistance to friction in rotating geared couplings with excellent corrosion protection. Applicable at a wide temperature range and has good load carrying capabilities in vibrating applications.

PETRONAS Grease PE HS meets or exceeds key industrial specifications.

#### Applications

PETRONAS Grease PE HS is recommended for use in:

 lubrication of flexible couplings in heavy industries at high accelerations and high speeds and heavy loads as in applications found in mining, cement, power plants, steel, paper & pulp and petrochemical industry

Note: PETRONAS Grease PE HS is recommended for operating temperature range of  $0^{\circ}$ C to +110°C (Max. +120°C).

Features and Benefits

Features	Benefits		
Excellent load carrying capacity	Contains special additives which enables the grease to withstand heavy loads without losing the lubricant film		
Friction resistance	Reduces friction in applications where high rotational load is experienced providing equipment reliability		
Excellent rust & corrosion protection	Protects metal surfaces against rust and corrosion, even when the grease is contaminated with water		
High resistance to water wash-out	Equipment protection and good lubrication even in presence humidity and water		
Excellent thermal and oxidation stability	Has excellent oxidation resistance and can withstand fretting corrosion even under high operating temperatures without hardening.
